Accomplishments

Since the beginning, P.A.T.T. has worked for highway safety and to save lives. Our continuing efforts are directed at local, state, national and international initiatives to enhance highway safety; especially in the area of commercial vehicles and the dangers resulting from the "Tired Trucker" dilemma. With your support we have made significant progress in some areas and continue to address needed changes in others. P.A.T.T. is a broad coalition of victims, survivors, government officials, truck drivers, shippers, receivers, carriers, concerned citizens and motorists working together for safe highways and to save lives.

P.A.T.T. Parents Against Tired Truckers

STAY ALERT – STAY ALIVE

Developed with date from Arizona Dept. of Public Safety

1. Have you been tailgating?
2. Are you changing lanes for no apparent reason?
3. Are you having a difficult time maintaining a constant speed?
4. Are you braking for no apparent reason?
5. Are you driving on the white lines?
6. Do you keep jerking the wheel to stay in your lane?
7. Have you drifted onto the shoulder of the roadway?
8. Are you constantly shifting in your seat?
9. Did you roll down your window for some fresh air?
10. Are oncoming headlights bothering you?
11. Are your eyes closing or going out of focus by themselves?
12. Are your eyes starting to burn?
13. Are you having wandering or disconnected thoughts?

- Participant, National Sleep Foundation International Forum '96 on Sleeplessness and Crashes, DC ('96).
- Established Internet Web Site: <http://www.patt.org>.
- Participant, 3rd International Conference on Fatigue in Transportation, Australia ('98).
- Hosted international symposium, Concrete Solutions for Reducing Truck Driver Fatigue ('99).
- Participant in California Trucking Association's "Town Hall Meeting" at International Trucking Show, Las Vegas ('99).

14. In the last hour, did you calculate the exact time you would arrive at your destination
15. Have you adjusted your radio more than once in the last hour?
16. Do you need stimulants to stay alert (caffeine, coffee, soda)?
17. Did you forget to turn off your turn signal from the last lane change?
18. Are other vehicles getting on your nerves?
19. Are you not aware that you are being passed by other vehicles?
20. Are you not able to remember the last warning sign you passed?

If you answer "yes" to four or more of these questions, you are starting to experience fatigue. Events are happening around you that require your full attention. If you are fatigued you are not able to respond quickly to events as they occur. A situation could rapidly develop that you may not be in a position to correct or deal with safely.

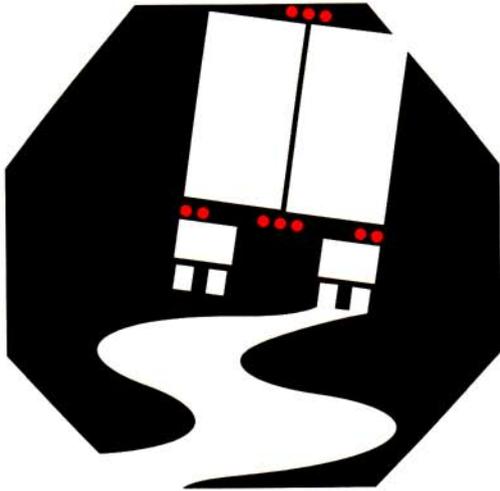

IF YOU RECOGNIZE THESE SYMPTOMS OF FATIGUE?
IT'S TIME TO TAKE A BREAK!

PLEASE DRIVE SAFELY!
